USB Write Events by Host

Intelligence Assessment
Removable Media Activity in Research Lab | 14–20 September 2026

Total Events	Affected Hosts	USB Write Events	Total Bytes Out (All Events)
168	12	2	3bn

event_id	timestamp_utc	host_id	device_id_normalized	action	file_name	bytes_out
C09-E139	9/19/2026 10:32:00 PM	H05	USB-1002	mount		
C09-E140	9/19/2026 10:33:00 PM	H06		bulk_read	materials_trial_raw.csv	
C09-E142	9/19/2026 10:38:00 PM	H06	USB-9921	bulk_write	materials_trial_raw.csv	2600000000
C09-E145	9/19/2026 10:41:00 PM	H06	USB-9921	unmount		

1. Key Finding

Evidence shows a 2.6 GB write event involving USB-9921 on host H06, associated with materials_trial_raw.csv. The related event chain includes mount (C09-E138), file read (C09-E140), write (C09-E142) and unmount (C09-E145). The evidence supports suspected unauthorized copying; onward disclosure and user intent remain unconfirmed.

2. Approval and Asset Impact

The allowlist entry A09-05 approves USB-1002 for host H05 for inventory export only. It does not establish approval for USB-9921 on H06. The observed write involves restricted research data, so the potential impact is high.

3. MITRE ATT&CK Mapping

Candidate technique: T1052.001 — Exfiltration Over USB.

Rationale: the observed USB write behavior is consistent with copying data to removable media. Confidence in this behavioral mapping is moderate; malicious intent is not established. No actor attribution or malware evidence is established by the available records.

4. False Positive, Evidence Gaps and Next Actions

Potential false positive: USB-1002 on H05 has a matching allowlist scope for inventory export. Also, the expired feed entry for USB-9921 should not be treated as current corroboration.

Next actions:

1. Preserve the host and USB evidence; verify file hashes and copied-file details.
2. Check the user's identity, approval records and DLP/network logs for evidence of onward disclosure.

Most important missing evidence: a forensic image or file manifest of the USB device, linked to the host's file-copy records.
